Conference  
2021**

## About the Firm

- FOA is proud to be CSEA's *only* endorsed, statewide law firm for all members and their families needing help with workers' compensation, personal injury, social security disability, and veterans' disability.
- Our relationship with CSEA began over 25 years ago.
- We have been working exclusively with union labor since 1963.
- An experienced, devoted team of a managing attorney and legal assistant are assigned to your case.
- Files are digitized so you and your legal team always have access to your file to check the status of your case, to see if documentation has been received, and to answer any of your questions anytime.
- FOA never charges for an initial consultation or question and never refuses a legitimate case.
- With the exception of some social security disability cases, there is *never* an out-of-pocket expense. FOA is only paid if you are awarded a financial settlement, which would be in an amount determined by the judge. In personal injury cases, the fee is set by the retainer agreement.

### **10 Offices throughout New York State**
